

HAVEN RESTAURANT SIEM REAP

Haven is a social project that teaches all of their employees and offers amazing quality traditional Khmer food, a lot of it vegan. A strong emphasis is also put on sustainability: they use only biodegradable materials in all of their takeaway containers, and source most of their products locally. You really have to try the tofu Amok, Cambodia's signature curry dish, which is done amazingly well here. There are several great salads on the menu too, as well as a few vegan sweets. Beautiful outdoor seating area.
